*Response to Arguments*

1. Applicant's arguments filed 5/29/2007 have been fully considered but they are moot in view of the new grounds of rejection.

*Claim Rejections - 35 USC § 103*

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 22-41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Son, (U.S. Pat # 6,697,376), in view of Ritchie, (U.S. Pat # 5,790,523).

Considering claim 22, the claimed 'VOD system, comprising a headend adapted to address communications comprising an identification of a group of subscriber terminals to all terminals of the group, so that the communication of the identification of the group is not addressed to any one particular terminal of the group, and the identification may be accessed and read by all of the terminals of the group', is met by the disclosure of Son, that the Logical Node ID generator 102 generates a Logical Node ID, which is inserted into the data stream to be

transmitted over the network 108 to all of the relevant subscriber stations, (Fig. 1; Fig. 2b; Fig. 3; Fig. 4; col. 7, lines 45-62; col. 8, lines 1-35; col. 9, lines 17-25; col. 9, lines 29-40).

The headend further adapted to receive a request for a VOD including the group identifier and to enable one or more modulators associated with the group identifier to pass the VOD downstream, is met by the disclosure in Son that the subscriber stations include the Logical Node ID in their VOD request, and the headend transmits the requested VOD over the appropriate modulator 106 (col. 4, lines 57-67; col. 5, lines 45-67; col. 9, lines 25-30).

As for the additionally claimed feature, 'headend adapted to receive a request including the group ID, to extract the group ID from eth request', even though Son teaches that the group ID is transmitted upstream in messages, the reference does not explicitly state transmitting the ID as part of a request. Nevertheless Ritchie, which is in the same field of endeavor teaches that a headend (HIU) transmits an ID to a terminal (CIU), and subsequently this ID is transmitted upstream with requests for service, by the CIU, col. 19, lines 35-63. It would have been obvious for one of ordinary skill in the art at the time the invention was made, to modify Son with the feature of transmitting an ID along with each request for service, for the purpose of ensuring that the source of each message to the server.

Considering claims 23, 27 & 35, see col. 2, lines 39-67; col. 4, lines 40-56; col. 8, lines 50-67.

Art Unit: 2623

Considering claims 24, 28, 36 & 40, Son teaches that the Logical Node ID may be periodically transmitted to the subscriber stations, (col. 8, lines 23-28; col. 9, lines 52-57).

Considering claims 25, 29, 37 & 41, Son teaches that the Logical Node ID may be sent as an MPEG stream, col. 8, lines 20-35.

Considering claims 26, 30 & 38, the claimed elements of a VOD system that correspond with subject matter mentioned above in the rejection of claim 22 are likewise treated. As for the claimed feature of 'a video server and an application server', the 'video server' reads on the operation of the video server 104b, Logical Node ID generator 102b, DVM 106b (Fig. 2B; col. 5, lines 45-67 thru col. 6, lines 1-33.). The 'application server' reads on the operation of the SSCM 314 at the headend, (Fig. 1; Figs. 2A; 2B; Fig. 3; col. 4, lines 52-67; col. 6, lines 45-67; col. 9, lines 25-29).

Considering claim 31, Son teaches transmission of Logical Node ID using out-of-band process, col. 7, lines 1-32.

Considering claim 32, the subscriber station of Son, meets all subject matter, (col. 6, lines 31-67; col. 9, lines 1-50).

Considering claim 33, see col. 2, lines 55-67; col. 7, lines 1-30 & col. 9, lines 50-67.

Art Unit: 2623

Considering claim 34, the claimed VOD system, comprising elements that correspond with subject matter mentioned above in the rejection of claim 22, are likewise treated.

Considering claim 40, see Son, col. 8, lines 1-35.

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
